Brian, this is worth mentioning as well. Having Haulers be responsible for treating their own septage, means they will be handling dry bags of lime, which poses a health and safety issue to the haulers themselves. As you guys now we use Hydrated Lime Slurry which is much safer. It doesn't react with the skin and mucus membranes the way powdered lime does, and doesn't create extreme heat like powdered lime does when mixed with water. It also doesn't produce dust which can be inhaled. I wanted you guys to be aware of the risks before you change the policy there.

Sincerely,  
Brandt Klutts

**Subject:** Santa Rita/Comal Ag Public Comment

Brian,

Attached please find Comal Ag and Santa Rita's public comment on proposed changes to 30 TAC ch. 312.

If you have any questions, please do not hesitate to call me.

Thank you for your consideration and have a nice weekend,

Helen
